

Enter the digits 0, 1, 2, 3, 4, 5, 6, 7, 8, 9 only once to satisfy the equations

52

$$\boxed{\phantom{00}} + \boxed{\phantom{00}} = 100$$

$$\boxed{\phantom{00}} - \boxed{\phantom{00}} = 8$$

$$\boxed{\phantom{00}} \times \boxed{\phantom{00}} = 24$$

$$45 \div \boxed{\phantom{00}} \div \boxed{\phantom{00}} = 3$$

Enter the digits 0, 1, 2, 3, 4, 5, 6, 7, 8, 9 only once to satisfy the equations.

53

$$\boxed{\phantom{00}} + \boxed{\phantom{00}} = 40$$

$$\boxed{\phantom{00}} - \boxed{\phantom{00}} = 3$$

$$\boxed{\phantom{00}} \times \boxed{\phantom{00}} = 0$$

$$36 \div \boxed{\phantom{00}} \div \boxed{\phantom{00}} = 1$$
